# EaglerCraft Servers List and Tutorial

Tutorial

You might be wondering; "How do I play servers on EaglerCraft?" Well, I have steps to show you the way to Multiplayer!

Step One: Make sure you have the latest version > EaglercraftX_1.8_u50_Offline_Signed.html
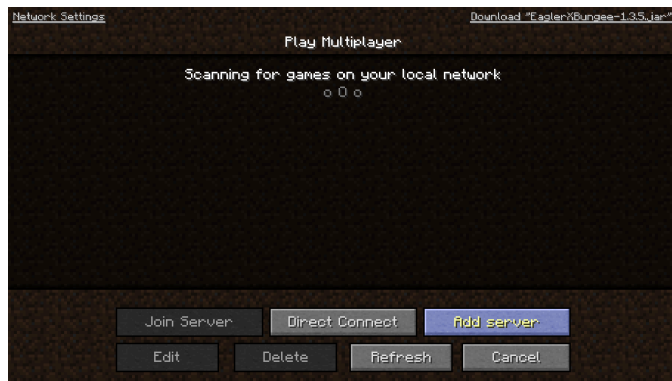

Step Two: Sign into your account with your username and skin.

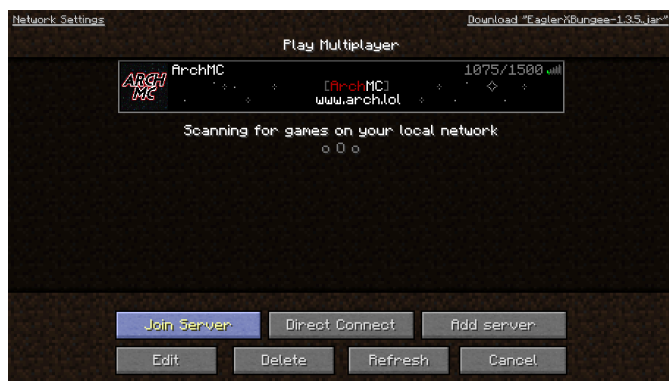

Step Three: Go into Multiplayer.

Step Four: Add a Server.

Step Five: If you don't know the IP of the server you want to join, check the list below. If you do know the IP, enter it in as well as a name for the Server. When you're done, click Done.

You have successfully added a server to your Server's List! Go ahead and click on it and click Join Server!

Server List

Comment here if I am missing a server!
